bromine use up to 50%* which helps prevent skin and eye irritations.

Get Down

work time for a more enjoyable spa experience.

Get Down

excess chemical levels for a responsible solution to water care.

Get Down

irritations like dry skin or faded swimsuits.

*Compared to the minimum ANSI recommended bromine or chlorine level of 2.0 ppm in a spa.

SPA FROG® Transforms Spa Care

SPA FROG® transforms your spa into the perfect environment for soothing relaxation. Feel the aches and pains melt away. Relax! FROG®'s on the job!

Automatic Means Less Work For You

The built in SPA FROG® In-Line System takes the thinking out of spa care with easy to set and replace cartridges. No measuring, no mess and no work for weeks at a time. The minerals destroy bacteria and help keep the pH in a safe range with less monitoring. A low 1.0 bromine level (50% less than most spas) finishes the job for a clean, clear spa ready to enjoy when you are.

Precise Water Quality

With minerals reducing bromine use, your spa will look crystal clear and feel silky soft. And all you have to do is set the cartridges. The mineral cartridge is maximized at setting #6. The bromine cartridge setting will vary and is easily adjustable to accommodate the spa size, circulation time and number of people relaxing each day. Every spa is different but all can benefit from the SPA FROG® experience.

In-Line system shown with Mineral Cartridge and the 150 Gram Bromine Cartridge.

Conveniently Long Lasting

Eliminate the daily maintenance of adding bromine or shock treatments before and after use. With SPA FROG®, replace the mineral cartridge every four months or when draining and refilling your spa. Replace the bromine cartridges when empty – usually every 3-4 weeks. In between is pure fun and relaxation!
