

# RESERVE & RENEW®

## Sanitizing System

The **Reserve & Renew**® sanitizing system eliminates the need for a floater, a brominator or the handling of dry chlorine. **Reserve** is a bromide salt that remains neutral in the spa water until the shock oxidizing agent **Renew**® granular is added. The two products react with each other to form active bromine. With proper maintenance and the regular addition of **Renew**® non-chlorine shock oxidizer, this system is very easy to use.

## FEATURES

- Chlorine-free
- Clears cloudy water
- Eliminates odors and contaminants
