

## GENERAL INFORMATION ABOUT **FIX A LEAK for Hot Tubs and Spas**

### Fix A Leak:

- **What it is:** It is a blended concentrated material designed to seal leaks in virtually any material
- **What it does:** Permanently seals leaks in the shell and plumbing up to 1/8"D
- **How much you need:** 8 oz per 1,000 gallons in hot tub (double for larger leaks)
- **How long it takes:** About a week (maybe less)

### **PRECAUTION: Keep out of Reach of Children.**

Can cause severe eye and skin irritation. Do not get in eyes, on skin, or on clothing. Harmful or fatal if swallowed. Avoid contamination of food. Rinse empty container thoroughly with water and discard.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, contact a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution. If these are not available, drink large quantities of water. Call a physician immediately.

### Directions

- **Shake Well Before Using**
- Use 8 oz. per 1,000 gallons for minor leaks. A second bottle can be added for larger leaks
- Bypass Filter before adding **FIX-A-LEAK** to water
- With pump running, add **FIX-A-LEAK** slowly through skimmer or in front of any other suction intake
- **FIX-A-LEAK** is very heavy and will sink to the lowest point rather quickly. It must be stirred back into suspension every 4-6 hrs. during circulation of water
- Continue to recirculate water until the leak has stopped
- After the leak has stopped, give hot tub proper time to cure (24-48 hrs). You may then return to normal filtration
- Treatment can be repeated if necessary

**NOTE:** Never allow cartridges or DE elements to dry before they are cleaned. Rinse clean with water.

**NOTE:** If your spa is foam-insulated and has been leaking for a long period of time:

- Once leak has stopped, drain your tub. Properly wipe down the spa with a wet cloth, nothing abrasive. Allow to dry for 4-5 days to allow all **FIX A LEAK** to properly cure before refilling
